BOSCH
Invented for life

- ▶ Universal mains input voltage
- ▶ Power factor correction
- ▶ Protection with automatic recovery
- ▶ Approved to power a PRAESENSA system controller and a PAVIRO controller and router
- ▶ Compact and DIN-rail mountable

The PRA-PSM24 power supply module is a compact DIN-rail mounted power supply, delivering 24 V at up to 10 A continuously. This power supply is an OEM power supply, made for Bosch by Delta Power Supply, as a cost effective alternative to the PRAESENSA multifunction power supply PRA-MPS3 to power a PRAESENSA system controller or other devices and utilities that need 24 V, in case the additional functions and characteristics of the multifunction power supply are not needed.

The PRA-PSM24 power supply can also power Bosch PAVIRO controllers and routers in case no battery backup is needed, as alternative to the Bosch PLN-24CH12 battery charger and power supply. The PRA-PSM24 is not certified for EN 54-4 and similar standards.

Functions

Mains power supply

- Compact DIN-rail mounted power supply, delivering 24 V at up to 10 A continuously, for powering various utilities and devices in Public Address systems.
- Universal mains input with power factor correction to maximize the amount of power that can be taken from a single phase power distribution network.

- The mains is supplied via a 3-pole screw plug that requires the module to be installed by professional installers and mounted in a safe place, without user access.
- Adjustable output voltage, 24 to 28 V.
- For fail safe redundancy it is possible to use two 24 V power supplies for one PRAESENSA system controller, one connected to its 24 V input A and the other to input B. In that case, the power supply with the highest voltage will supply the power, the other one is available as backup.

Protections

- Overvoltage protection with automatic recovery.
- Overload protection with automatic recovery.
- Over-temperature protection with automatic recovery.

Architects' and engineers' specifications

The 24 V power supply module shall contain a mains input with power factor correction and a 24 V output. Output current capability shall be 10 A continuous and 15 A peak. It shall be approved to power Bosch PRAESENSA and PAVIRO equipment. The power supply shall be DIN-rail mountable with passive cooling. The power supply shall be marked for UL and CE and be compliant with the RoHS directive. Warranty shall be three years minimum. The power supply module shall be a Bosch PRA-PSM24.

Technical specifications**Electrical****Power transfer**

Mains power supply input	
Input voltage range	100 to 240 VAC
Input voltage tolerance	85 to 264 VAC
Frequency range	50 to 60 Hz
Inrush current	< 35 A (115 V, 230 V)
Power factor (PF)	0.9 to 1.0
Leakage current to safety ground	< 1 mA (240 V)
24 VDC output	
Nominal DC output voltage	24 V
Output voltage range	24 to 28 V
Maximum continuous current	10 A
Derating	-0.25 A/°C above 50°C
Maximum peak current	15 A
Power consumption	
Active mode, rated power	265 W
Heat loss	
Active mode, rated power	90 kJ/h (85 Btu/h)
